

std::reverse_iterator< Base >

std::reverse_iterator< Base >

detail::json_reverse_iterator< Base >

```
graph BT; A[std::reverse_iterator< Base >] --> C[detail::json_reverse_iterator< Base >]; B[std::reverse_iterator< Base >] --> C;
```

The diagram illustrates a relationship between three C++ reverse_iterator types. At the top, there are two identical boxes, each containing the text 'std::reverse_iterator< Base >'. Below these, centered, is a third box containing 'detail::json_reverse_iterator< Base >'. Two vertical arrows point upwards from the bottom box to the two top boxes, indicating that 'detail::json_reverse_iterator< Base >' is a specialization or inherits from 'std::reverse_iterator< Base >'.
