

std::false_type

std::false_type

detail::has_to_json< BasicJsonType, T, typename >

```
graph TD; A[std::false_type] <-- B[std::false_type]; B --> C[detail::has_to_json< BasicJsonType, T, typename >];
```

The diagram illustrates a relationship between three types. At the top, there are two identical boxes, each containing the text 'std::false_type'. A horizontal line with arrows at both ends connects the bottom of these two boxes. From the center of this horizontal line, a vertical line descends to the top of a third box. This third box, located at the bottom, contains the text 'detail::has_to_json< BasicJsonType, T, typename >'. This structure typically represents a specialization or inheritance relationship in C++.
