

std::false\_type

std::false\_type

detail::is\_comparable< Compare, A, B, typename >

```
graph BT; A[detail::is_comparable< Compare, A, B, typename >] --> B[std::false_type]; A --> C[std::false_type];
```

The diagram illustrates a function call and its return value. At the bottom, a box contains the function signature: `detail::is_comparable< Compare, A, B, typename >`. Two arrows originate from the top of this box and point upwards to two separate boxes at the top. Both of these top boxes contain the text `std::false_type`, indicating that the function returns this value in both cases.
